Invoice — Heritage Bites website

From: Lulamile Mkhungela — design and development **To:** Regomoditswe Moremedi — Heritage Bites **Invoice number:** HB-2026-11-01 **Date:** 13 November 2026 **Amount due: R4 400,00 Payment reference:** HB-INV-01

What this invoice is for

The Heritage Bites website, built and delivered as agreed: the public storefront, the menu with your confirmed prices, the ordering path, the contact form, the loyalty card page and the search and social setup.

The work is finished and live. This is the once-off price for the build, not a subscription, and nothing on this invoice is a monthly charge.

Included in the R4 400

THE SITE

Pages	Home, Meals, This Week, About Us, Contact, Loyalty card, Customer quest, Policies, Checkout — nine public pages
Menu	Traditional plates at R100 and Contemporary at R130, with proteins, starches and vegetable sides as you confirmed them
Plate builder	A customer picks a protein, a starch and a side; the price is fixed at the plate price
Basket	Add, change quantity, remove, and it is remembered between visits
Collection and delivery	Rosebank and Sandton only, with the R100 minimum order enforced
Ordering hand-off	A finished basket goes straight to WhatsApp with the order already written out, so nobody retypes it
Contact form	Delivers to the Heritage Bites inbox
Loyalty card page	Explains the stamp card; one stamp per R50 spent, ten for a meal on us
Customer quest	A request-a-dish form for plates not on the menu yet
Policies	Privacy, terms, delivery and collection, refunds and cancellations — the five you approved
Search and sharing	Page titles, descriptions and previews for Google and WhatsApp; a sitemap
On a phone	Every page built mobile-first and checked at phone width
Speed	No heavy libraries; the site is built for a slow connection

ALSO INCLUDED, AT NO CHARGE

- **Forty-five days of fixes.** Anything broken in what I built, I fix free until 31 December 2026.
- **Handover.** The files, the domain and every account in your name.

Not included — priced separately when you ask

These are real pieces of work, not paperwork. None of them is needed for the site to be live and correct today. Each one is quoted in writing before any work starts.

Item	What it takes	Indication
Hosting and go-live	A Node.js host, HTTPS, the domain pointed at it	R2 500
Yoco live card payments	Wiring your live keys and proving one real order end to end	R3 000
Staff order console	A screen to accept, complete or cancel an order — today the alert is a notification, not a queue	R12 000 – R18 000
Owner admin	Change a price, add a dish, mark something sold out, without calling me	R15 000 – R25 000
Drinks and add-ons	Once you send names and prices	R2 500
Uber Eats / Mr D store links	Once you have direct store URLs	R750

Indications only. A firm quote follows once we agree the scope.

Yours to supply — no charge

These come from your side of the business. There is no fee for putting them in, and none of them is on this invoice.

1. **A place for the site to run** with Node.js, HTTPS and a persistent folder. GitHub Pages can show the menu but cannot take an order — no server, no payments, no loyalty lookup.
2. **Your Yoco live keys**, entered in the host's own settings. Never send them to me in a message.
3. **The exact collection point** at Standard Bank, Rosebank and Sandton.
4. **Photos for Tlhakwana and Smiley.** Both currently show "photo coming soon" rather than a picture of the wrong dish.
5. **Confirmation that the contact form reaches** `heritagebitesfood@gmail.com`, and who replies to it.
6. **Direct Uber Eats and Mr D store links**, if you use those platforms.

The full open list is in the handover document you already have.

Running costs — paid by you, to the provider

Not my fee, and not on this invoice.

	Approx.
Domain (`heritagebites.co.za`)	R150 – R300 a year
Hosting, once you are taking live orders	R150 – R300 a month

The rules, plainly

1. **This is a once-off price.** R4 400 for the build as described above. No monthly fee is owed to me unless you ask for ongoing work.
2. **Fixes are free for forty-five days** (until 31 December 2026) on anything that is broken in what I built.
3. **New work is quoted before it starts.** A change, a feature or an addition gets a written price first. Nothing is billed without you agreeing to it.
4. **Content changes after handover** — a new price, a sold-out dish — are work I do for you. Until the owner admin exists, send them to me and I will quote or do them, whichever we agree.
5. **Hosting, domain and Yoco are your accounts.** I set them up and look after them if you want, but they are paid to those providers, not to me.

Payment

Amount	**R4 400,00**
Due	On receipt
Terms	Once off — nothing further is owed for this work
Reference	HB-INV-01

Banking details on request, or pay by EFT to the account I send with this invoice. Please use the reference so it matches the right job.

Delivered and checked before invoicing

Every page was tested at phone width, every image checked for a broken link, and the whole order path run end to end. The delivery rule was corrected before this invoice was sent: **delivery is included in the plate price**, as you confirmed — a delivered traditional plate is R100, not R155.

Thank you — it was a good thing to build.
