Heritage Bites

Screens, as built

Current public-site screens, captured from the running build on 2026-10-27. The staff console is intentionally removed.
17 screens · desktop at 1440 px, phone at 390 px · each page shows the screen, what it does, and what to look for.

01. Home

/ · 1440 px viewport · Traditional & Contemporary Plates — Heritage Bites

Hero, ordering actions, the Thursday/Friday service window, both plate menus, delivery rules and the loyalty card.

The moving meal ticker shows names without prices; the public header has no status strip or address.

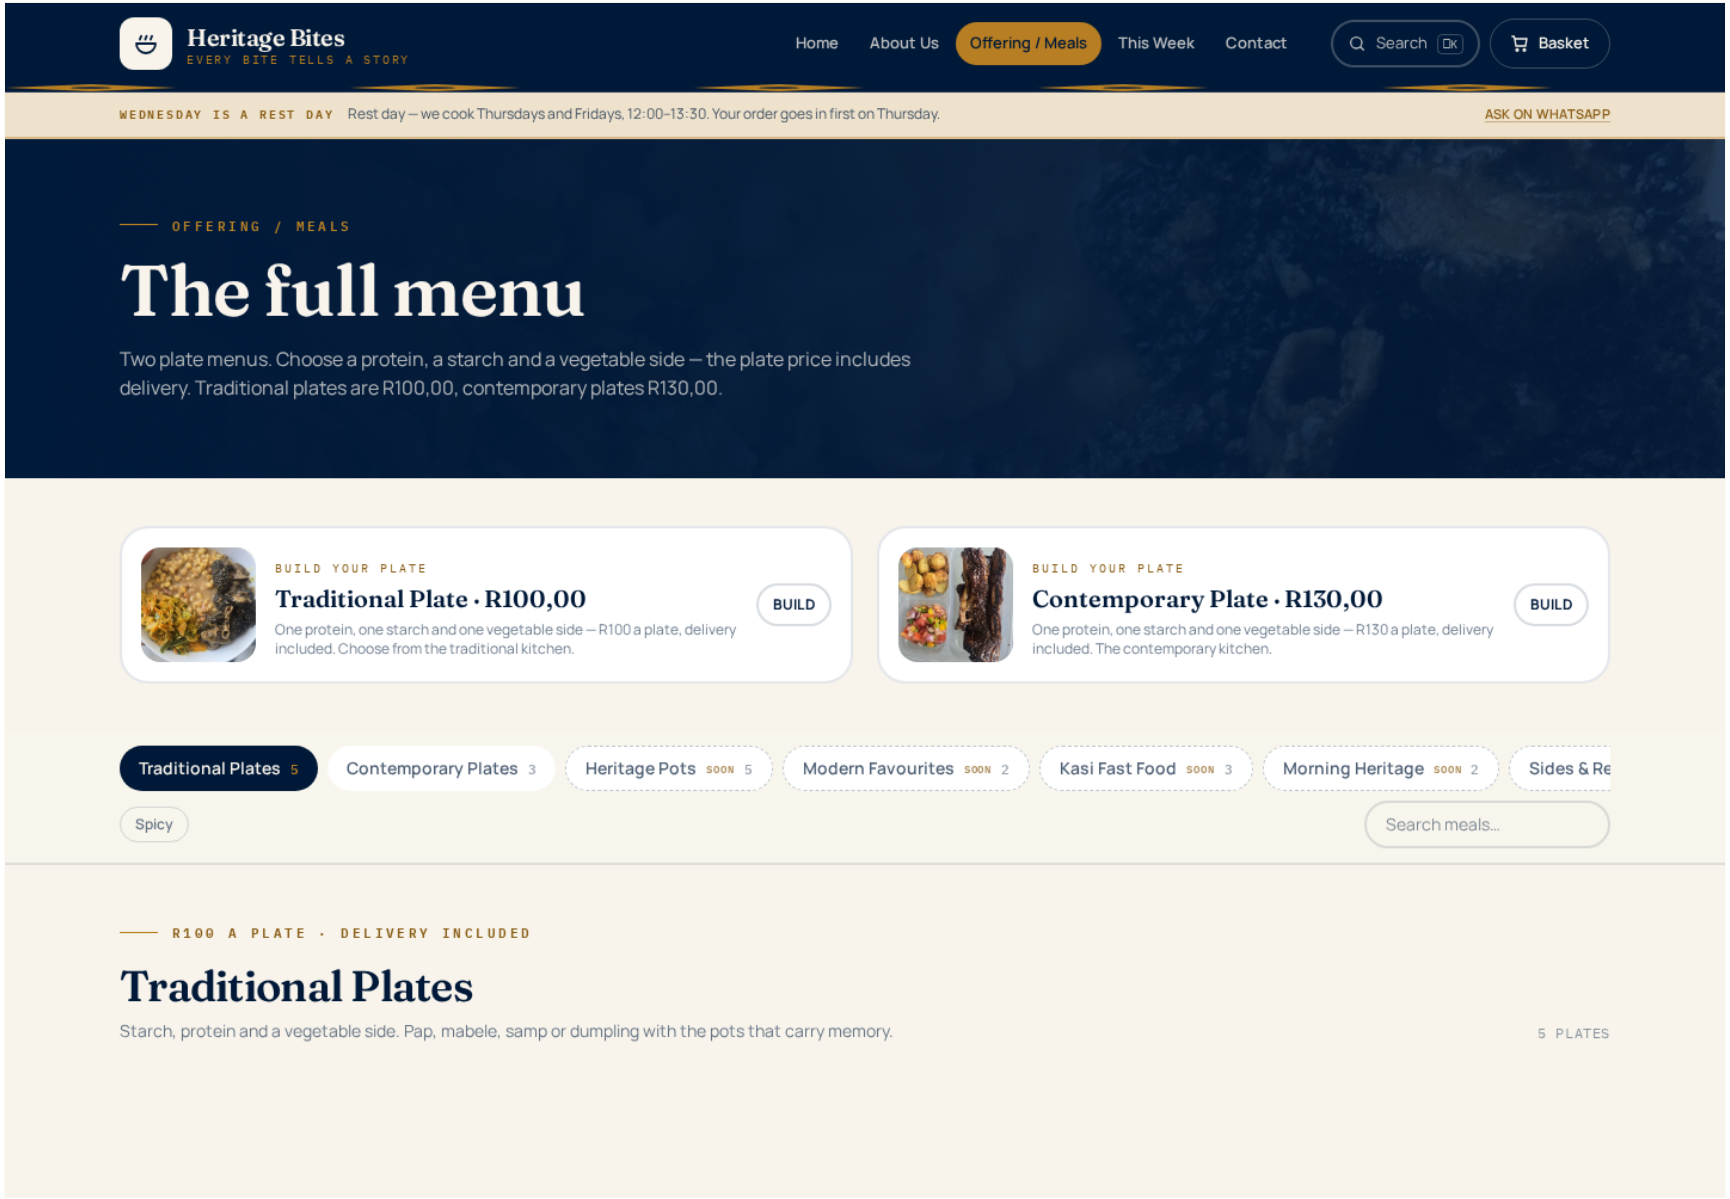

02. Home on a phone

/ · 390 px viewport · Traditional & Contemporary Plates — Heritage Bites

The home page at 390×844, showing the responsive public storefront.

Navigation collapses, basket remains available, and hero copy reflows for a phone.

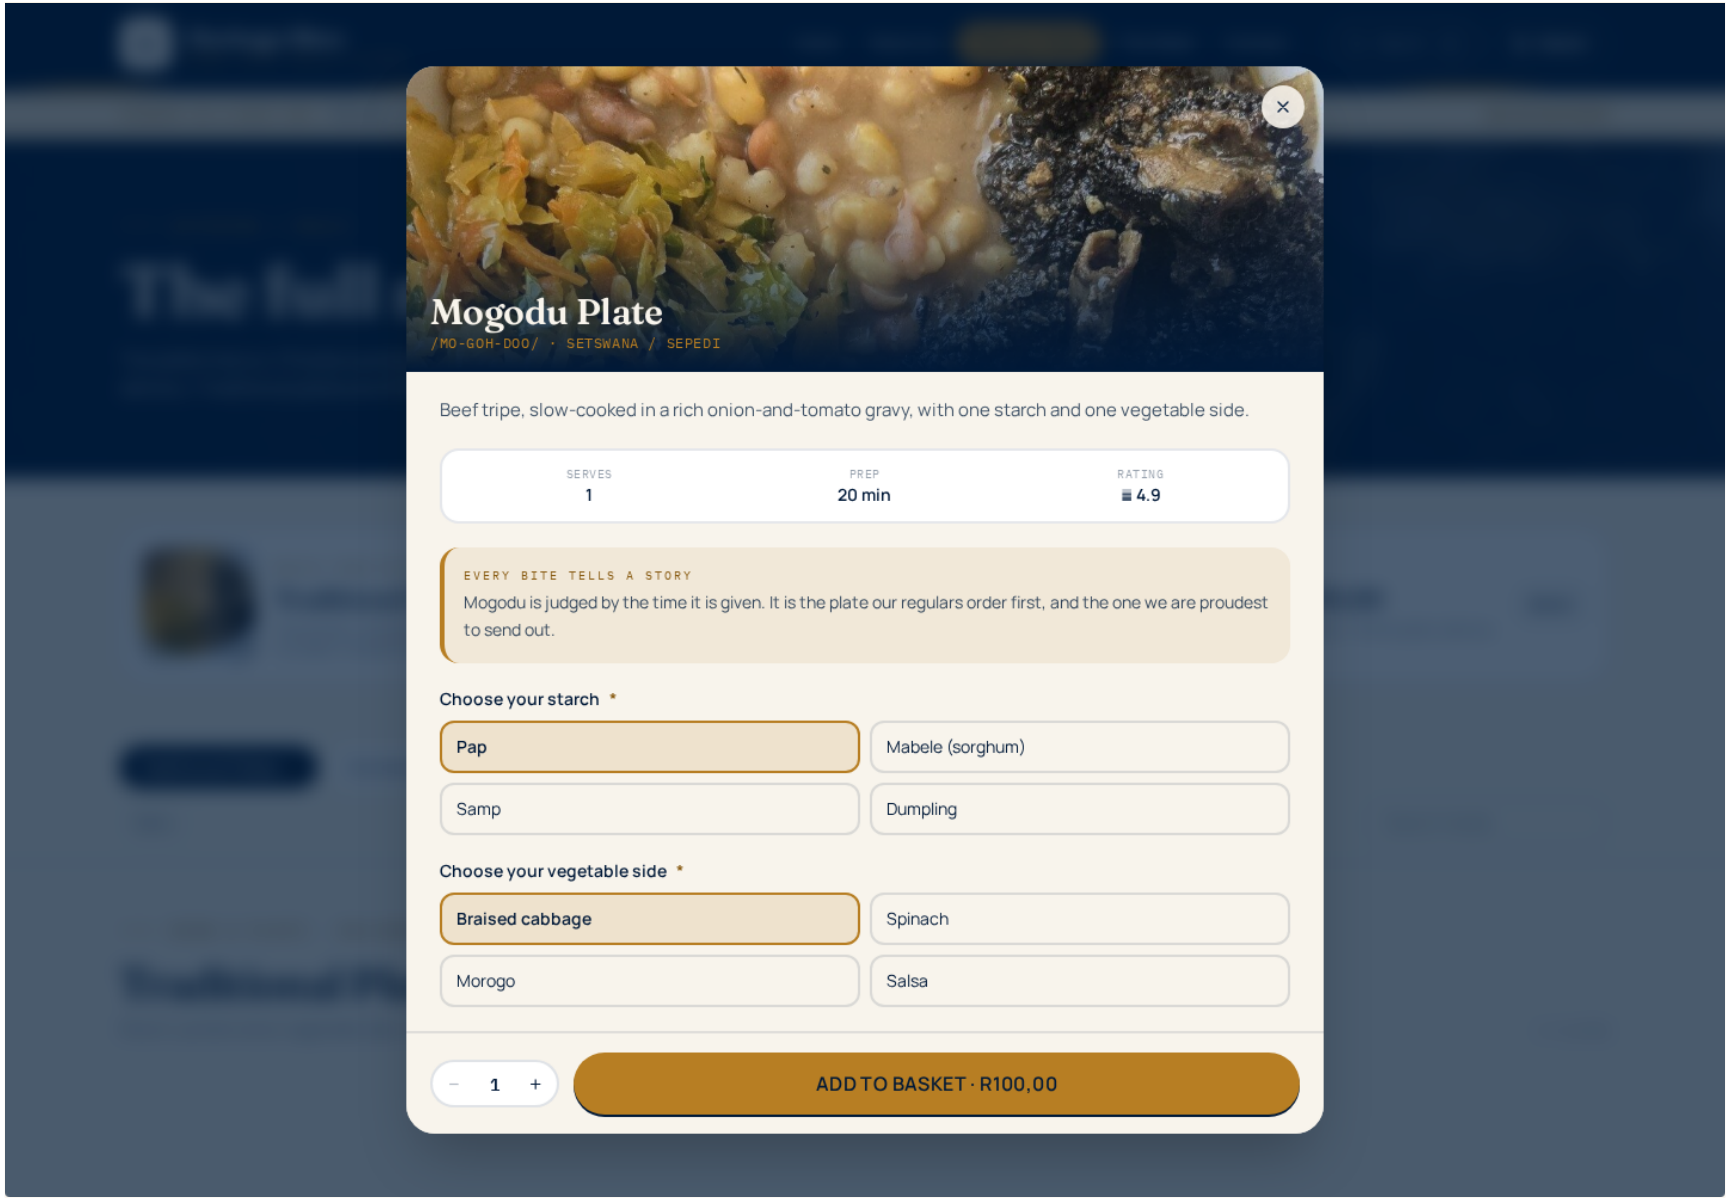

03. Meals

/menu · 1440 px viewport · Meals — Heritage Bites

The Traditional and Contemporary plate menus, with meal search, category navigation and both plate builders.

The sticky category chips highlight the section currently in view.

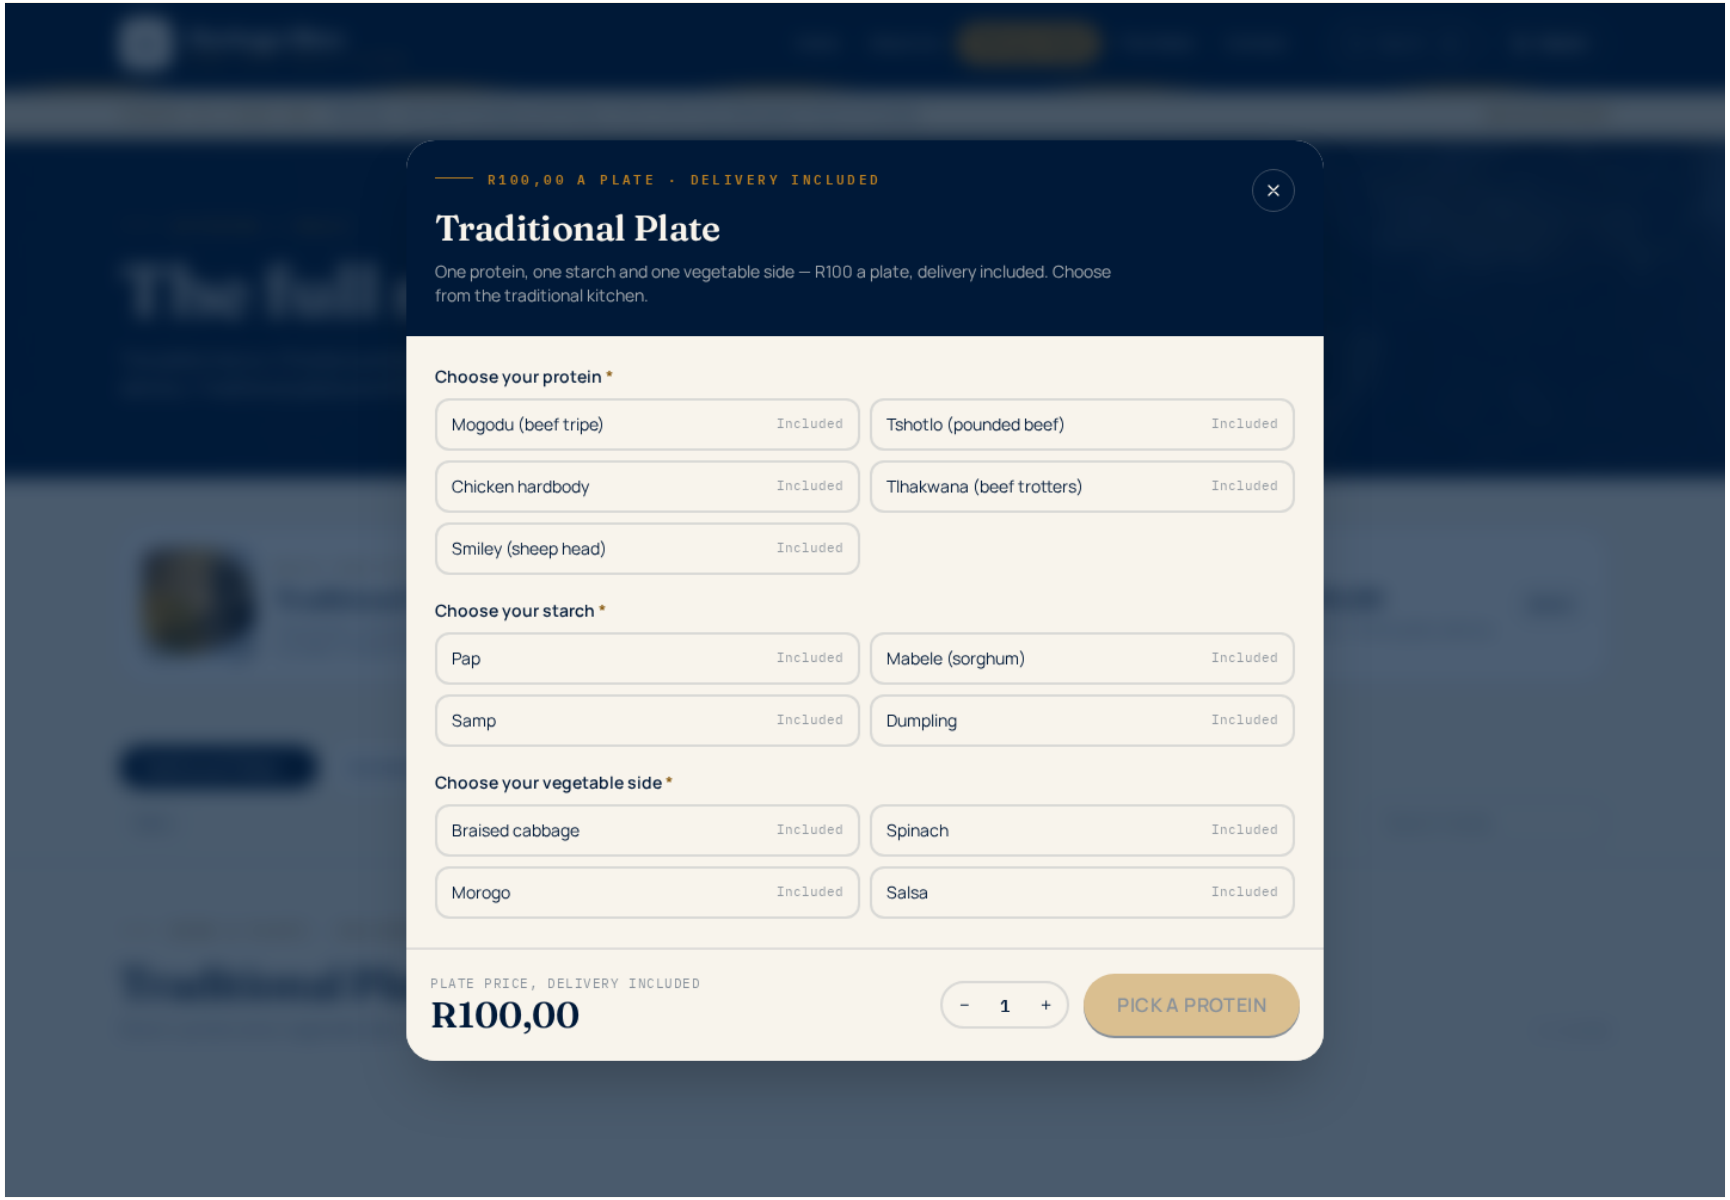

04. Dish details

/menu?item=mogodu-plate · 1440 px viewport · Meals — Heritage Bites

Dish photo, story, starch and vegetable-side choices, all included in the R100 plate price.

> The details use the current menu information without nutrition or unsupported dietary claims.

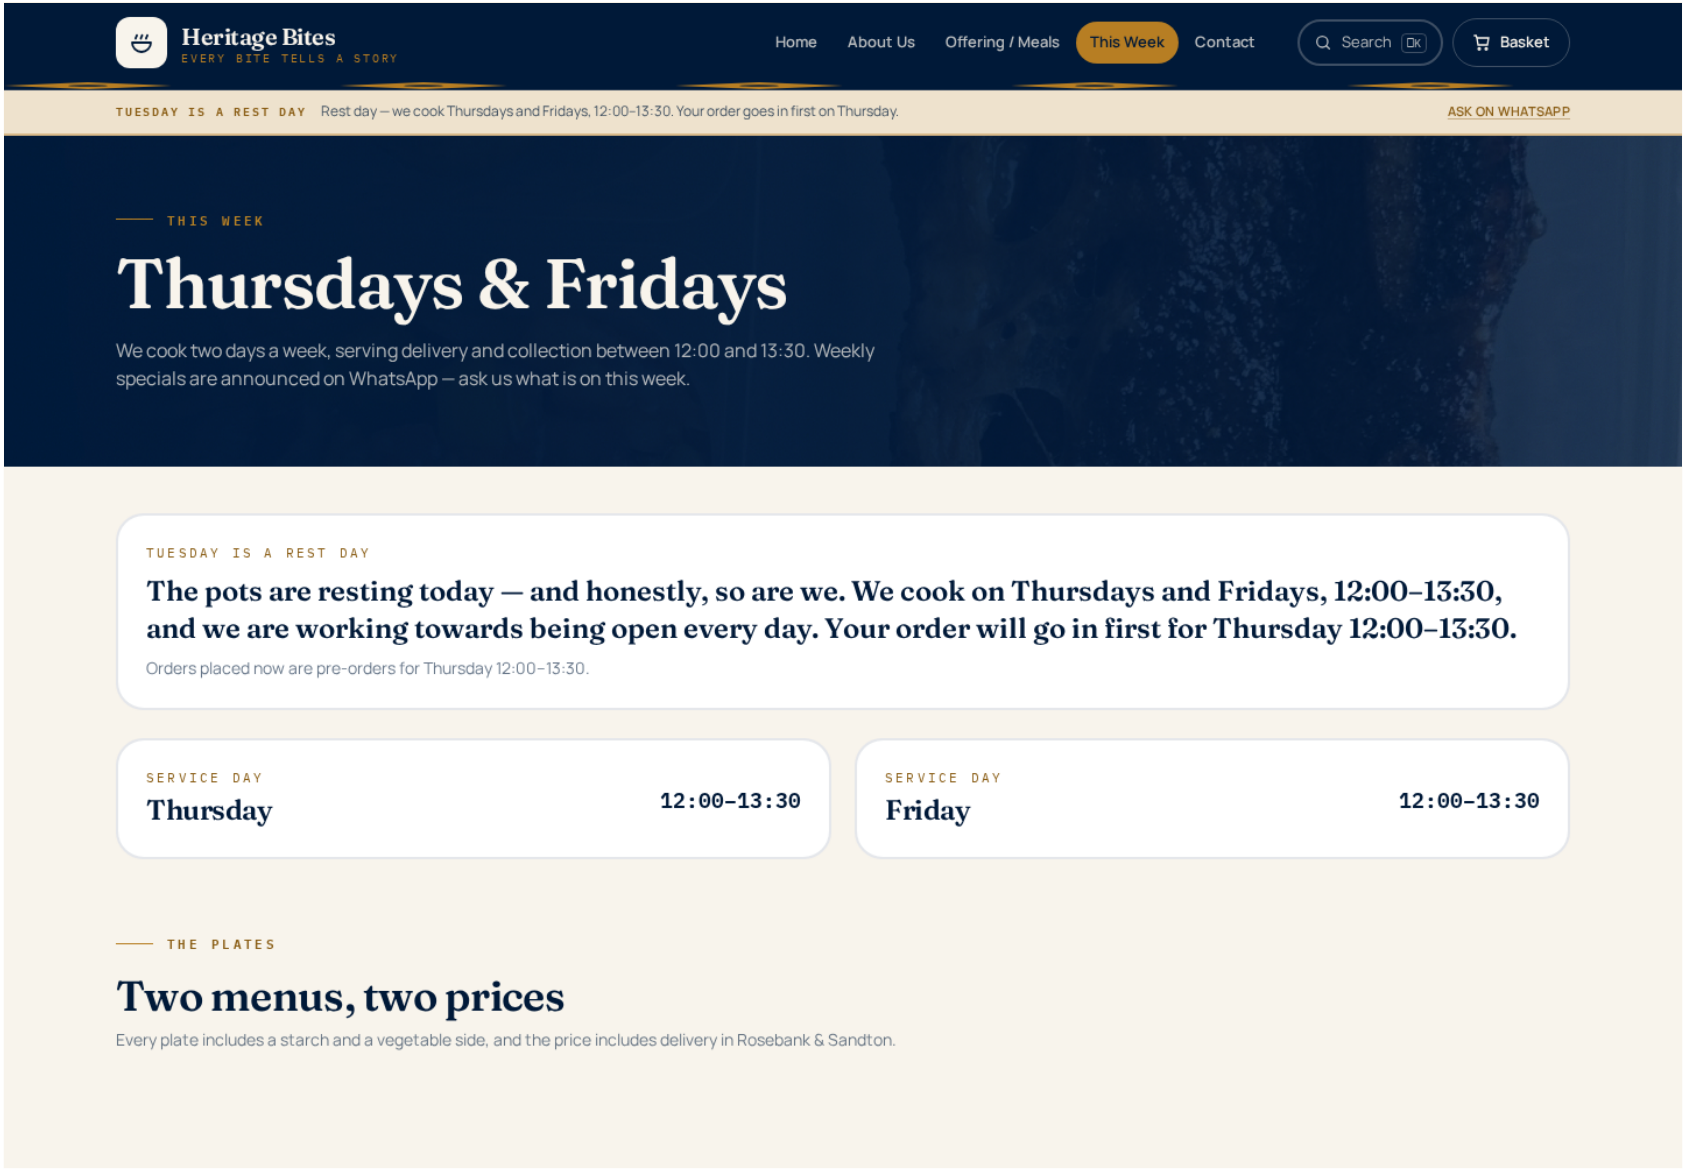

05. Build a Traditional Plate

/menu?builder=traditional · 1440 px viewport · Meals — Heritage Bites

The plate builder lets customers choose a protein, a starch and a vegetable side at the fixed R100 plate price.

Every component is included in the plate price, and delivery is included in turn.

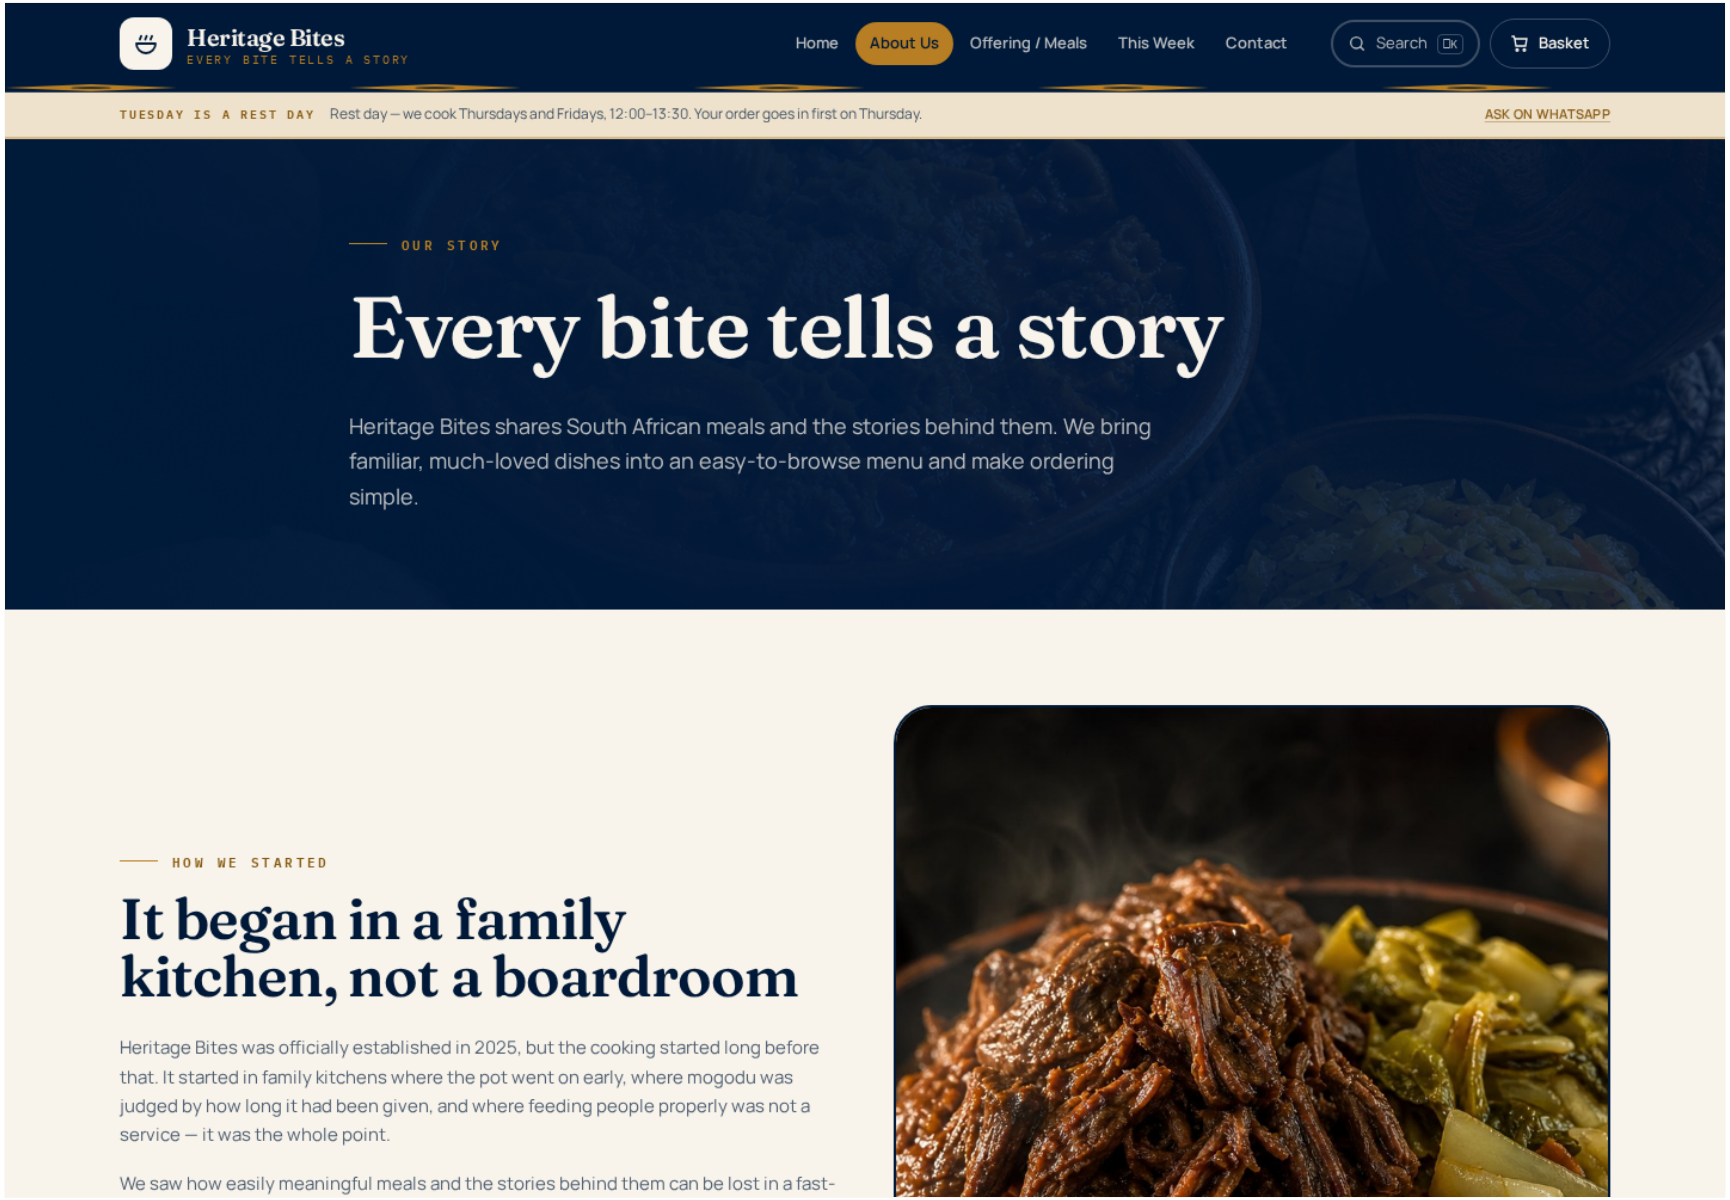

06. This week

/specials · 1440 px viewport · This Week — Heritage Bites

The real service week: Thursday and Friday 12:00–13:30, both plate menus, delivery areas, minimum order and collection point.

> No day-of-week promotions are invented; specials are announced on WhatsApp.

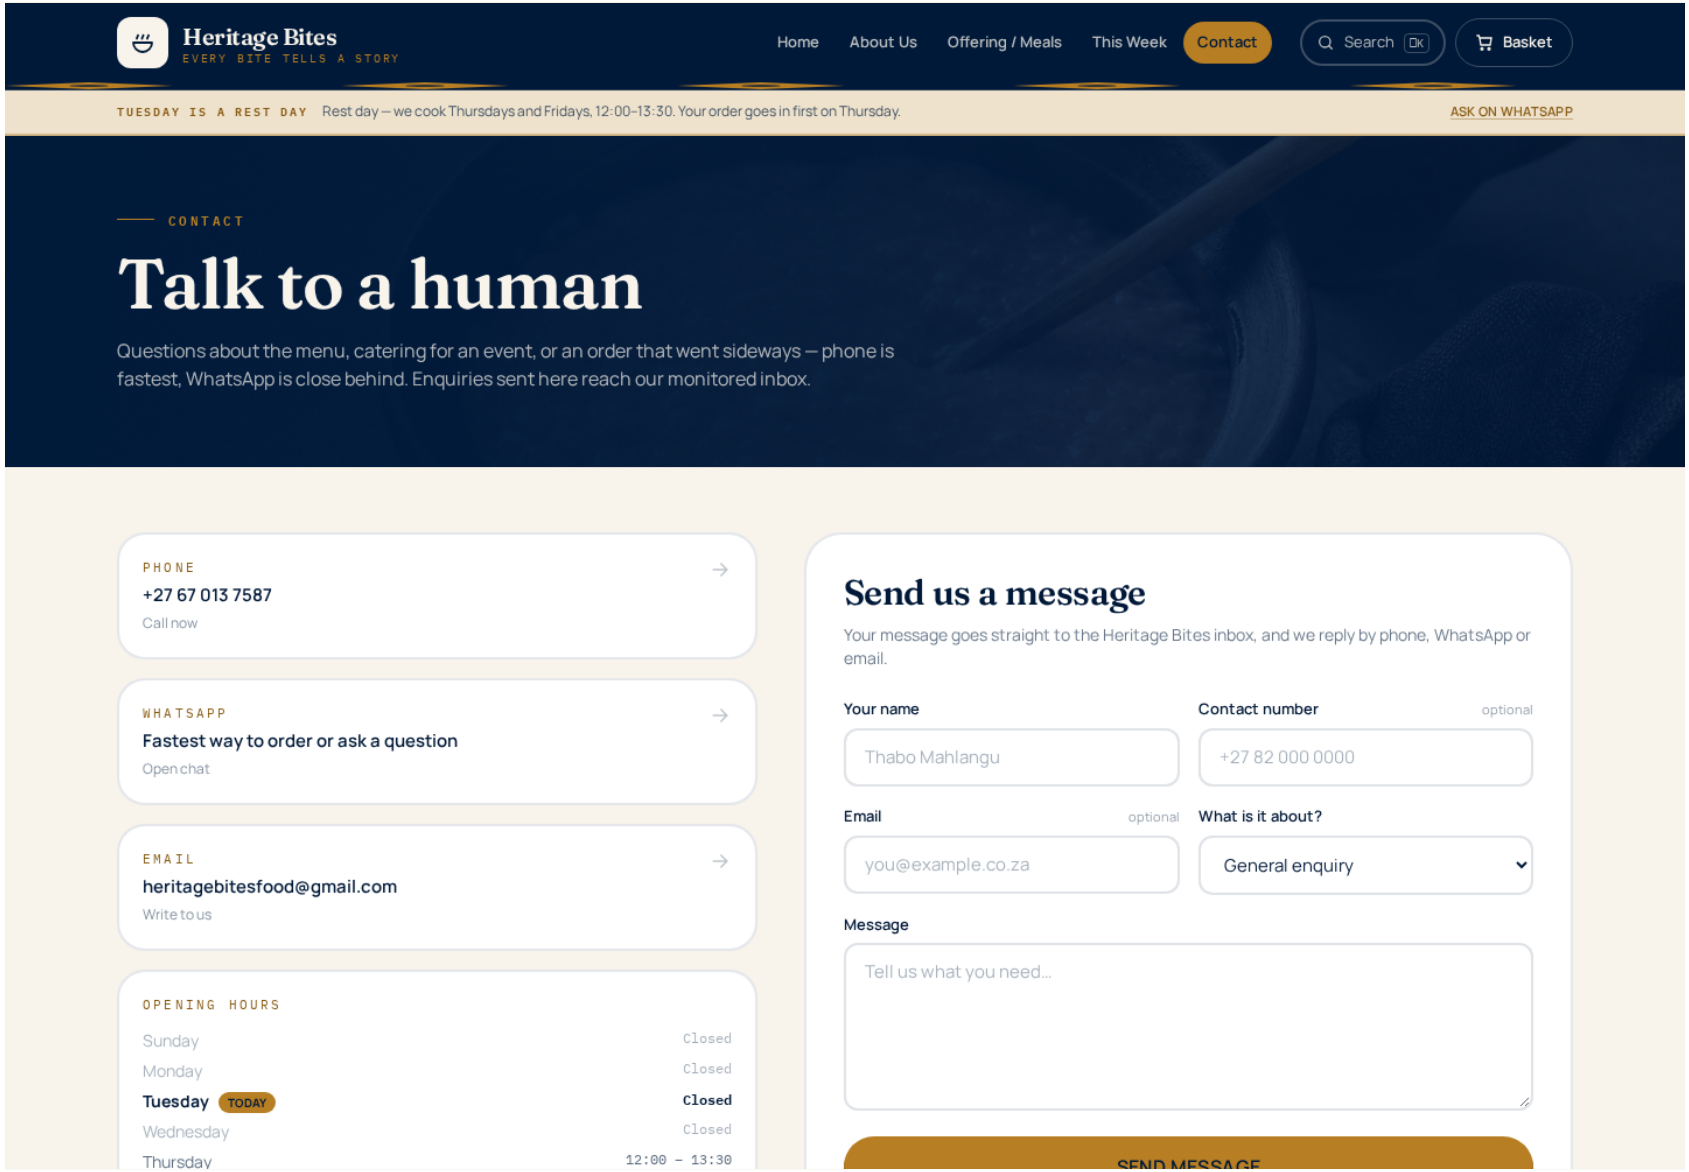

07. About Us

/about · 1440 px viewport · About Us | Our Story, Vision & Mission — Heritage Bites

How We Started, Vision, Mission, values and story timeline within About Us.

Vision, Mission and How We Started are grouped under About Us rather than separate top-level links.

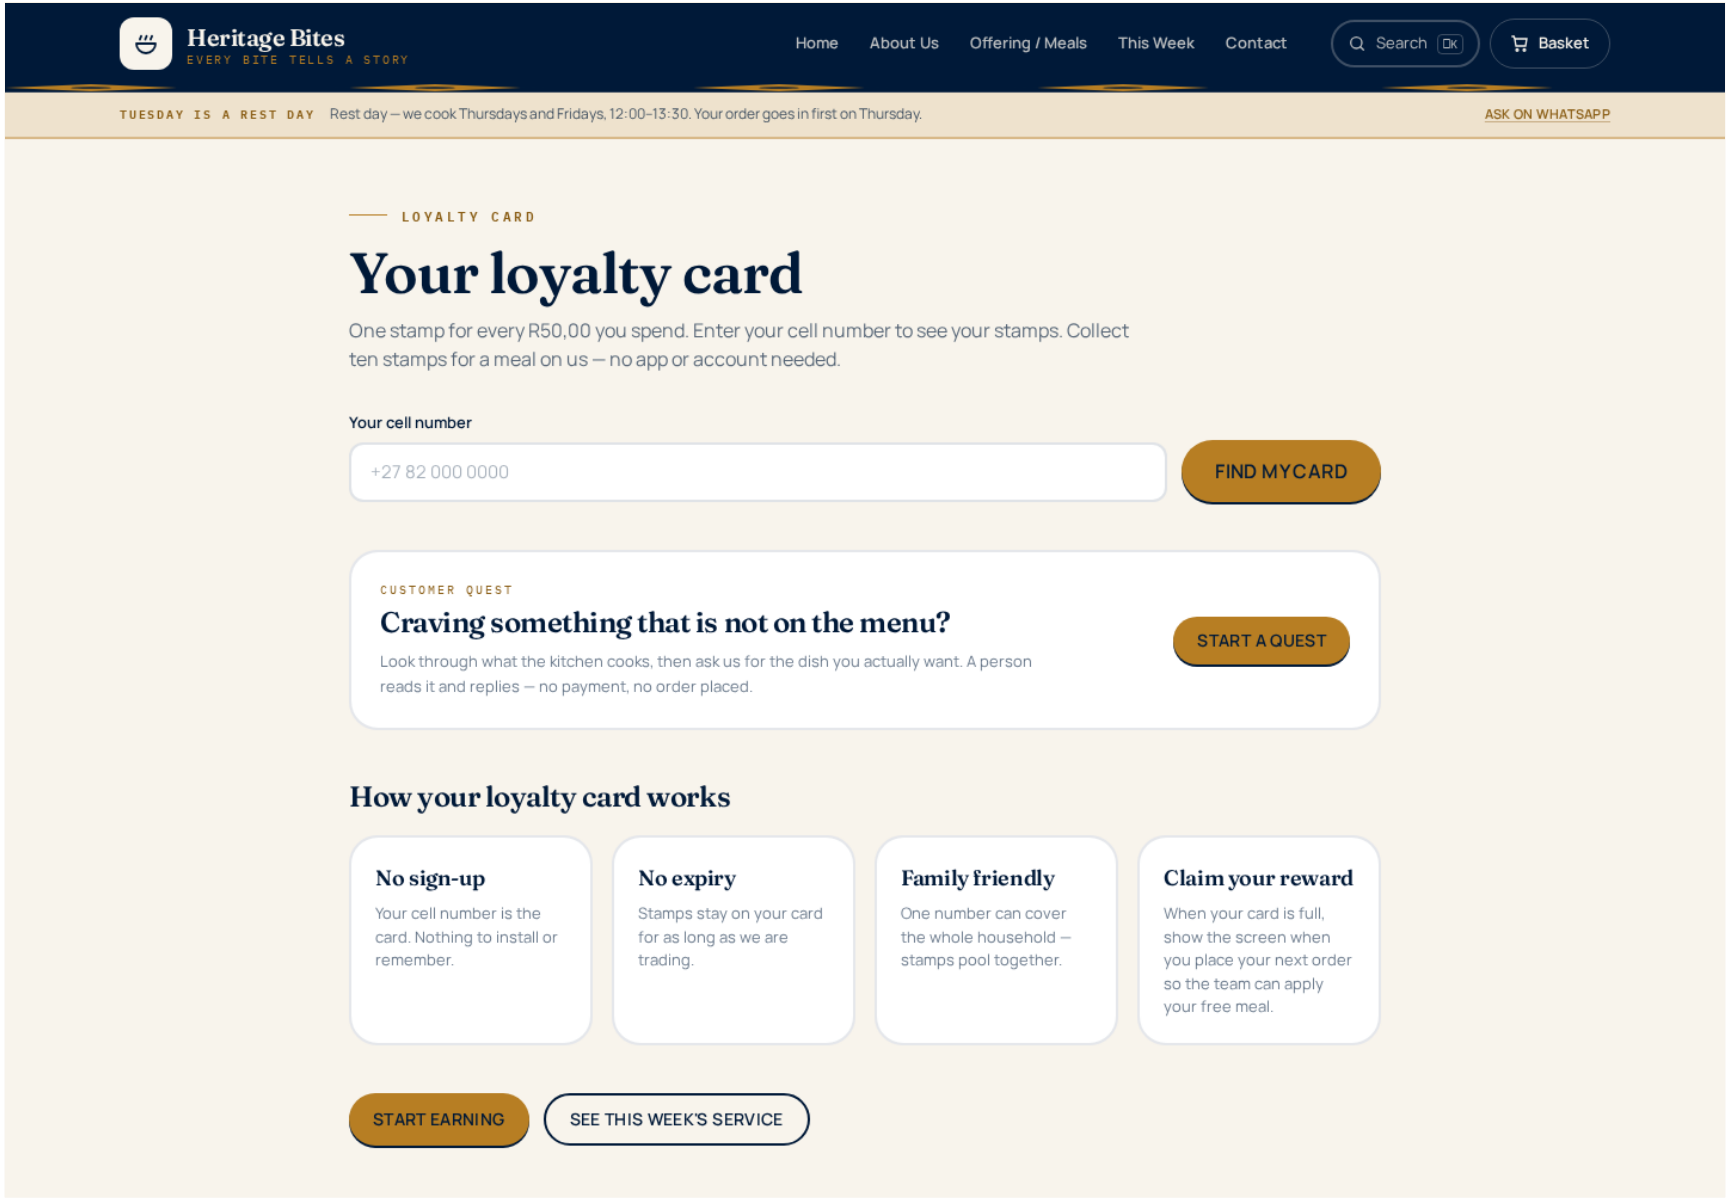

08. Contact

/contact · 1440 px viewport · Contact — Heritage Bites

Phone, WhatsApp, email, Thursday/Friday hours, delivery rules and the enquiry form, without a public business address.

> The form delivers to the business inbox; the exact collection point is confirmed by WhatsApp rather than published.

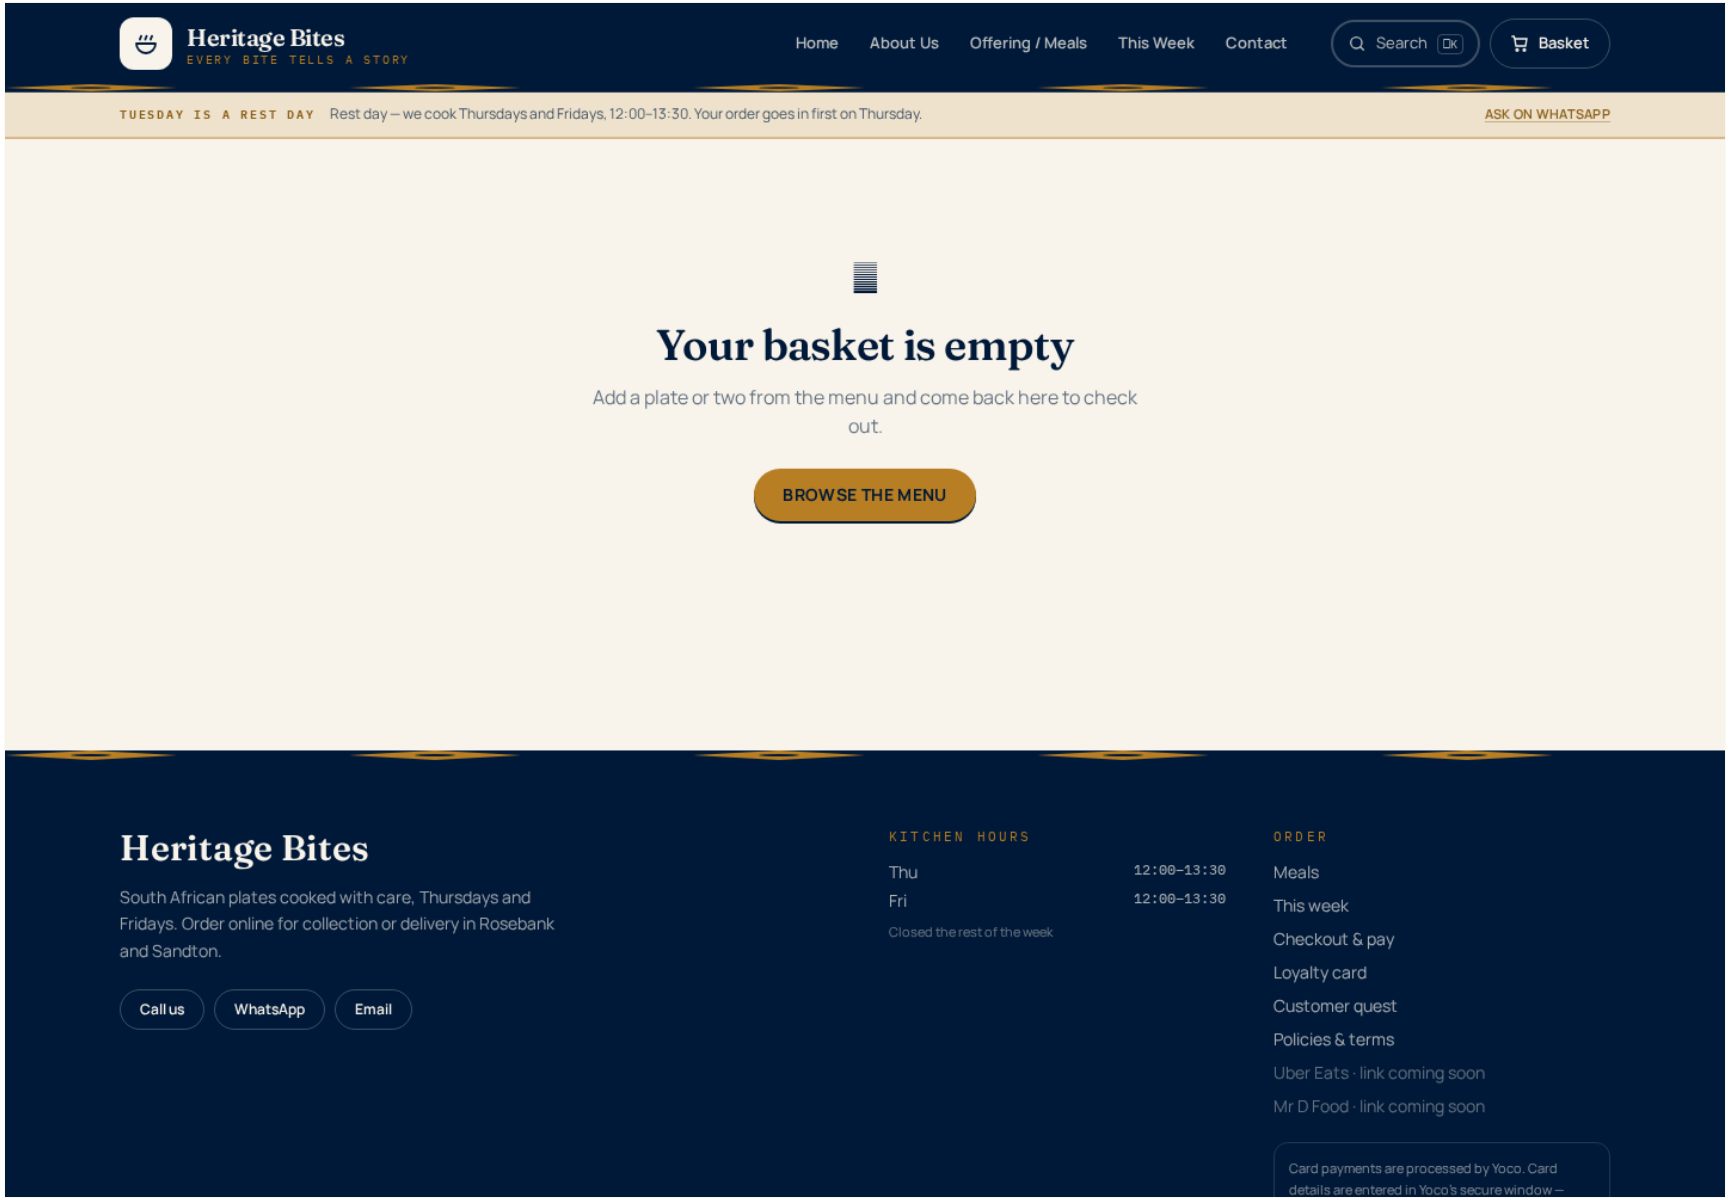

09. Loyalty card

/passport · 1440 px viewport · Loyalty card — Heritage Bites

A simple loyalty card lookup by cell number, with stamp balance and reward details.

The feature is called a loyalty card throughout the public site.

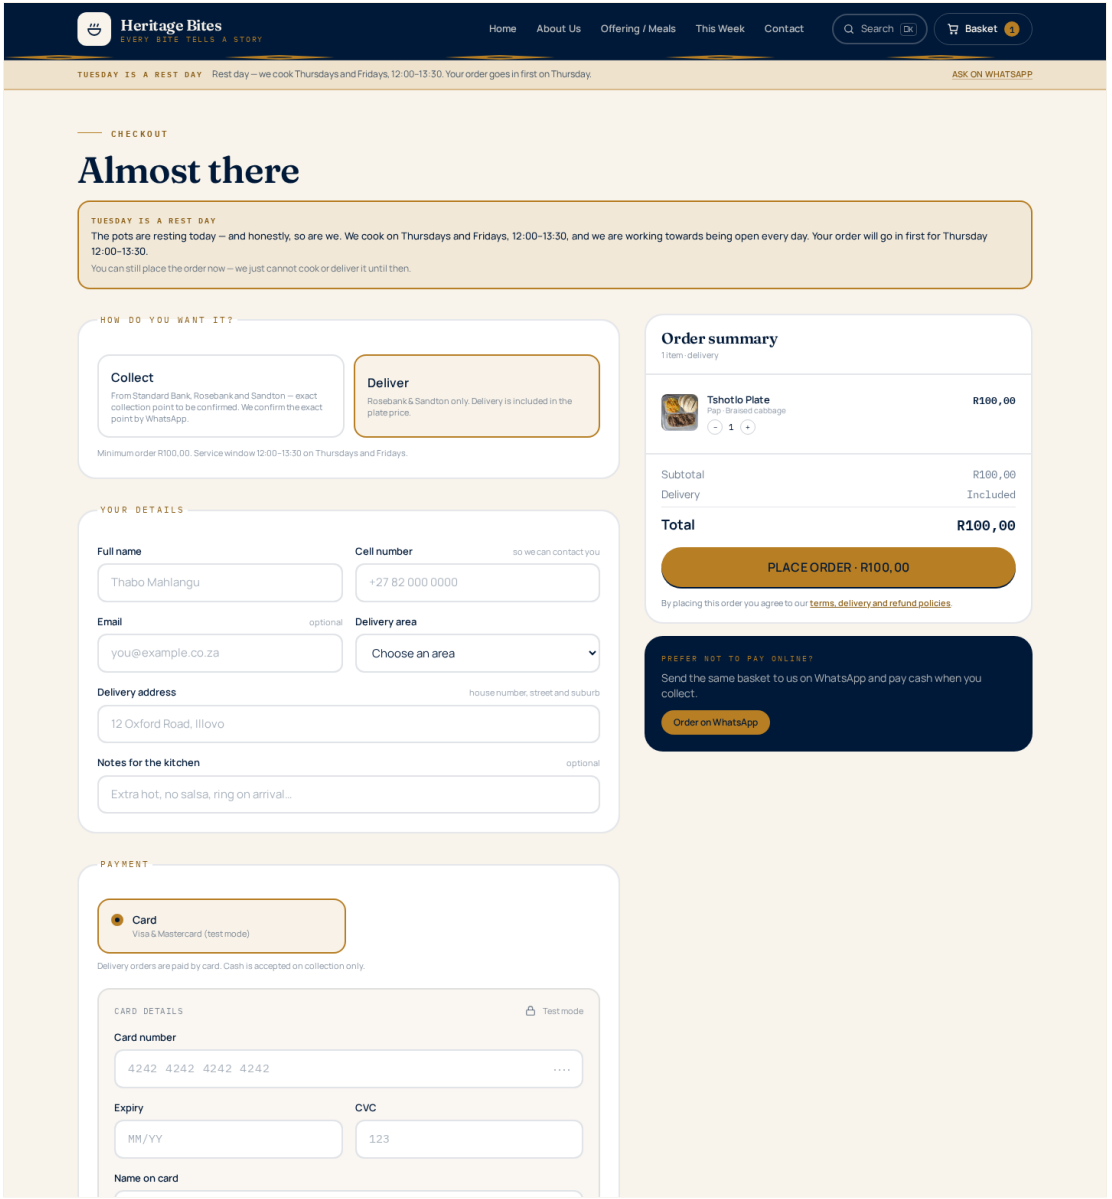

10. Checkout, empty

/checkout · 1440 px viewport · Checkout — Heritage Bites

The empty state shown when a customer reaches checkout without items.

A clear route back to the menu, not a dead end.

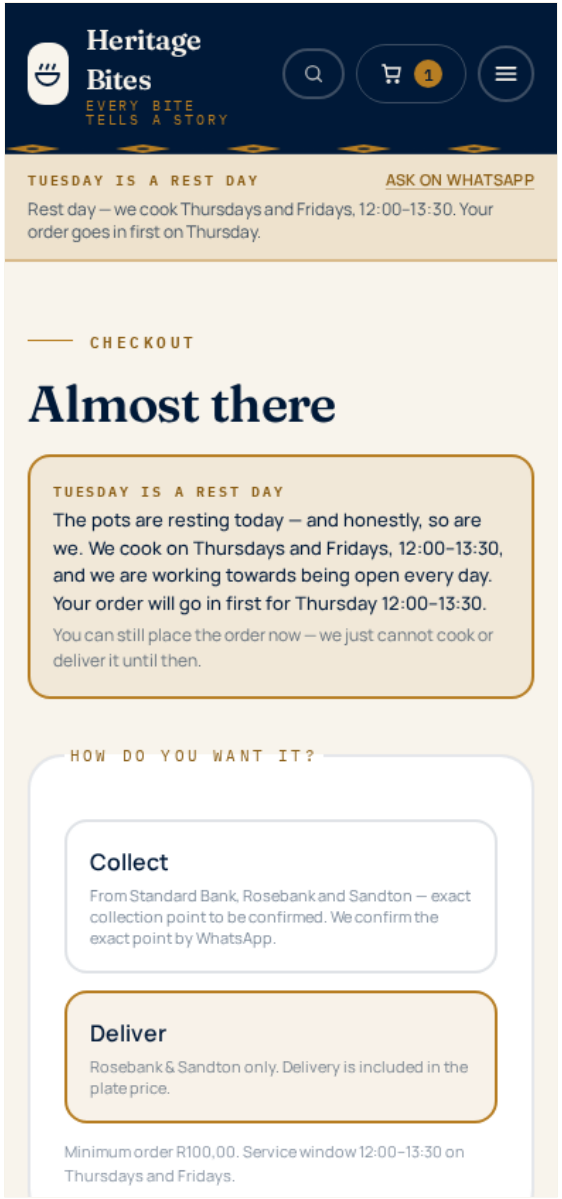

11. Checkout, delivery

/checkout · 1440 px viewport · Checkout — Heritage Bites

A populated checkout with customer fields, collection selection, order summary and the current payment form.

Delivery is included in the total, the service window is stated, and updates remain manual by phone or WhatsApp.

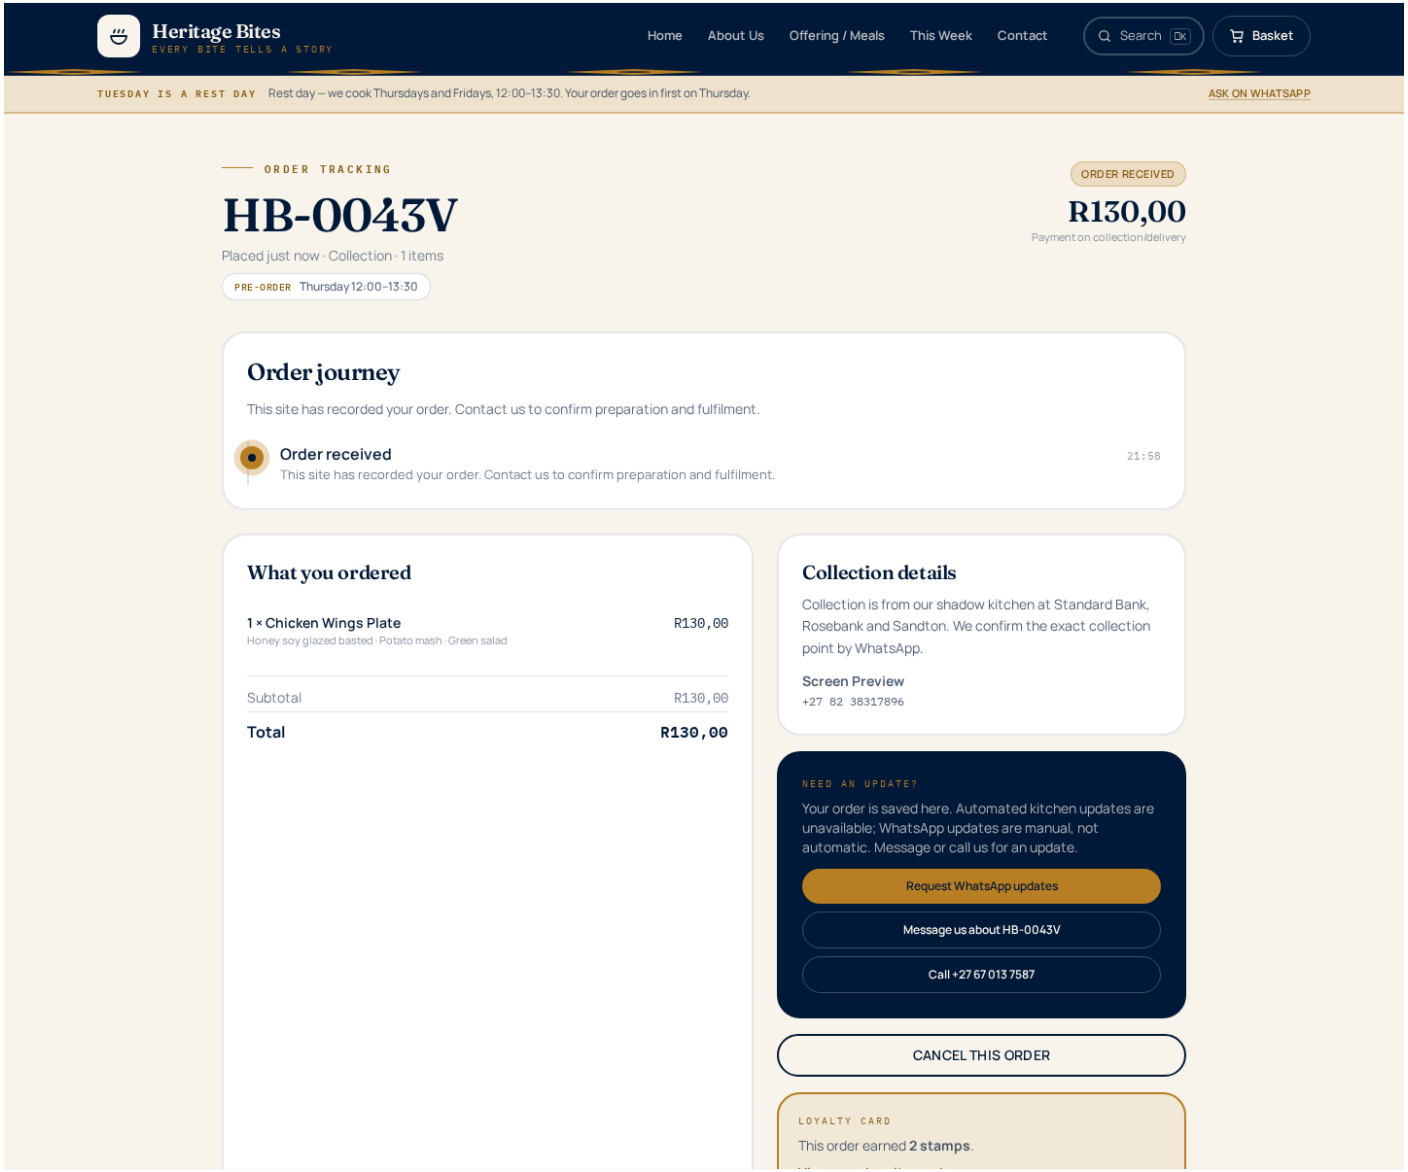

12. Checkout on a phone

/checkout · 390 px viewport · Checkout — Heritage Bites

The populated collection checkout rendered at 390×844.

Fields and totals remain usable in the mobile layout.

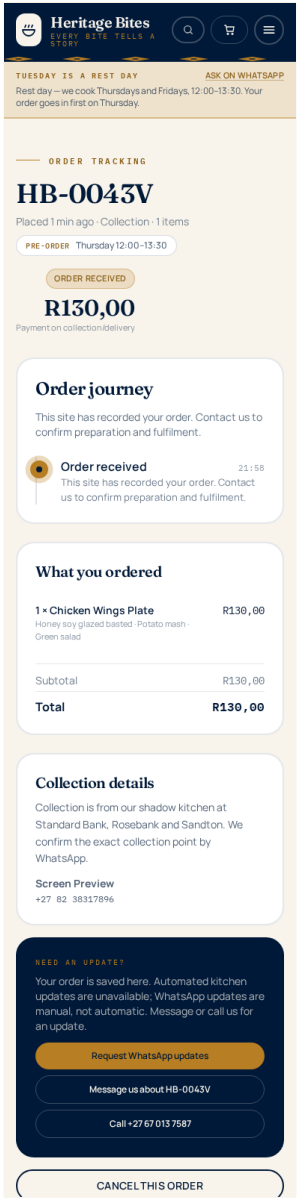

13. Order receipt and details

/order/[secure-link] · 1440 px viewport · Order HB-0043V — Heritage Bites

Secure order receipt, item summary, payment and contact details.

No live progress or automatic messages are claimed; the customer is told to contact the restaurant for a manual update.

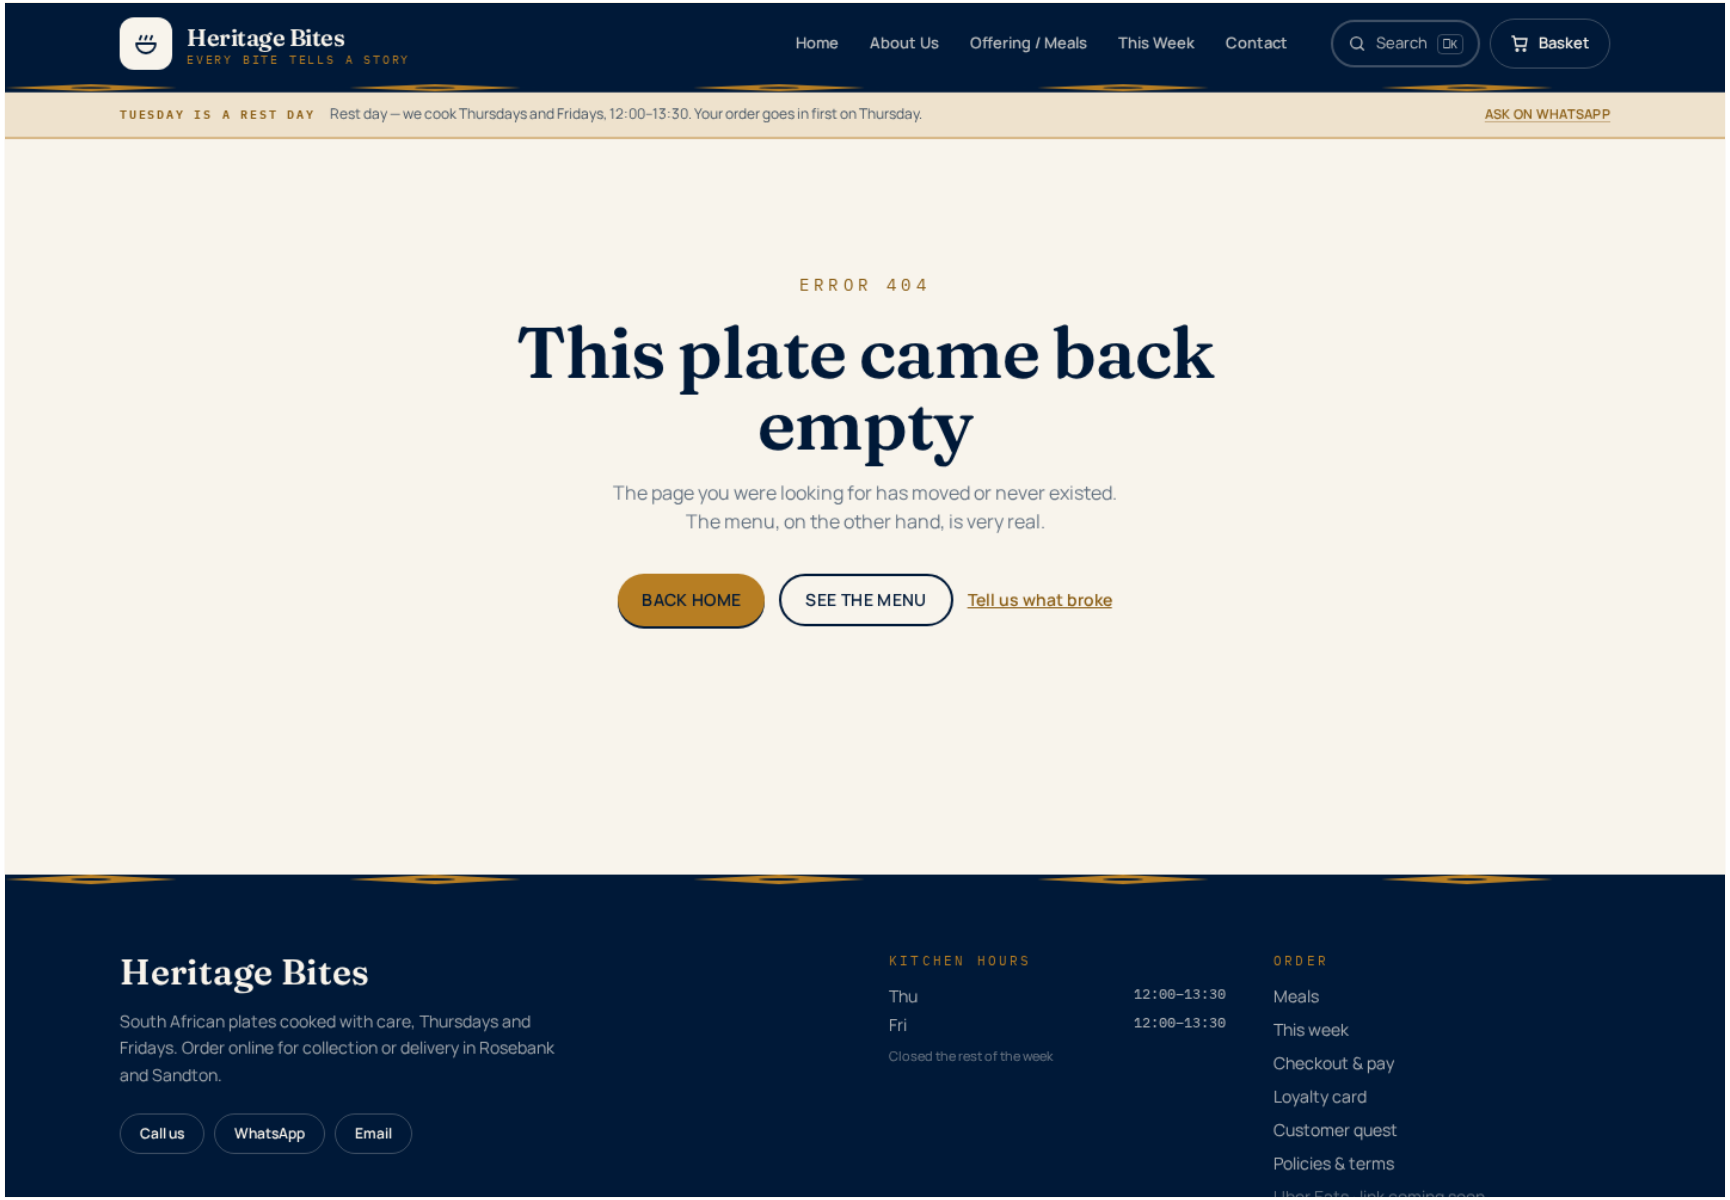

14. Order receipt on a phone

/order/[secure-link] · 390 px viewport · Order HB-0043V — Heritage Bites

The secure order page at 390px, with details and direct contact actions.

> Order and contact information remains legible at phone width.

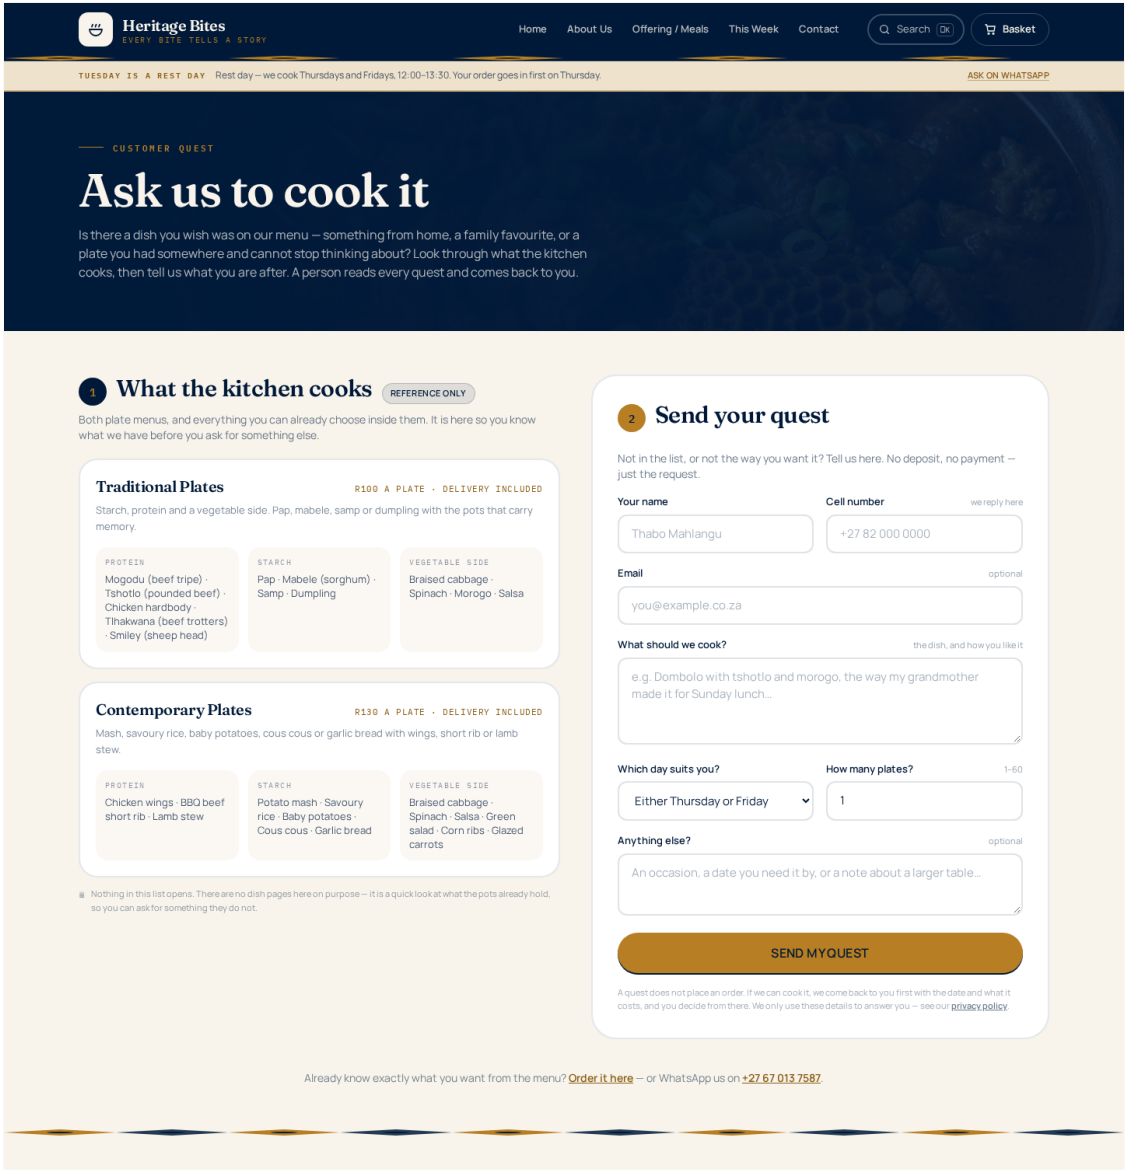

15. Not found

/no-such-page · 1440 px viewport · Page not found — Heritage Bites

The 404 route with the storefront shell, rather than a browser error page.

A clear way back to the menu.

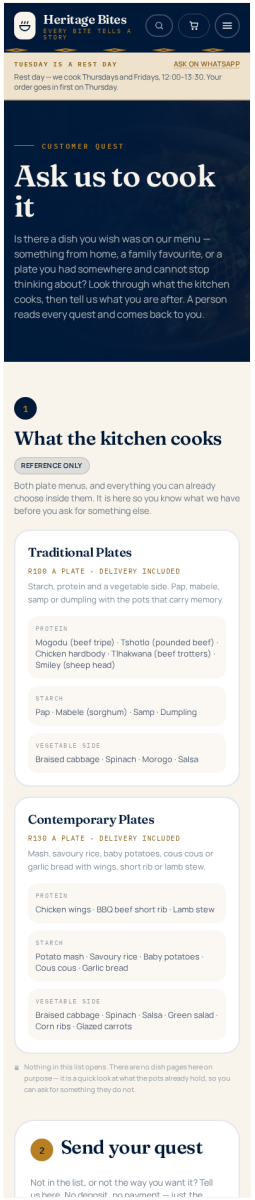

16. Customer quest

/quest · 1440 px viewport · Customer quest — Heritage Bites

The customer-quest page: both plate menus as a view-only reference, then the request form.

> The reference contains no links, no buttons and no dish photos — nothing in it opens. A submitted quest is a request, not an order.

17. Customer quest on a phone

/quest · 390 px viewport · Customer quest — Heritage Bites

The quest page at 390px: the view-only reference stacks above the request form.

> The reference stays readable and still opens nothing on a phone.
